Extreme performance is what you can count on from our 200 series hose ends. Our single nipple design swivel hose ends give you a full 360° of adjustability. These re-usable hose ends feature “smooth bend” technology for increased flow and performance. Available in traditional red and blue, black, and nickel for that stainless or chrome look.

A-1 Performance Plumbing 200 series hose is the one that many top race teams depend on for quality and reliability. Two layers of woven stainless steel braid around a chlorinated polyethylene (CPE) inner hose. The inner braid resists collapse and maintains pressure rating. The outer braid protects against chafing, vibration and heat risks. The CPE inner hose make it compatible with all synthetic lubricants, oils, coolants, alcohol and nitromethane. Use with any of our 200 series hose ends for the perfect fit, performance and reliability you can depend on.

PUSH FIT HOSE ENDS & ADAPTERS

PUSH FIT HOSES

300 SERIES PUSH FIT HOSE

A-1 Performance Plumbing push fit hose is constructed of a CPE inner hose bonded with a reinforced textile braid and covered with a blue synthetic cover. Applications for this hose is are gasoline, alcohol, oil, air and water. For high heat or high pressure applications we recommend using our lightweight stainless steel hose clamps. Use with any of our PF series hose ends for the perfect fit, performance and reliability you can depend on.

600 SERIES STEEL BRAIDED PTFE HOSE

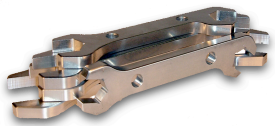

A-1 Performance Plumbing 600 series hose delivers dependable performance for extreme high pressure applications such as brake systems. This smooth bore hose strongly resists expansion under high temperature and high pressure and is compatible with all brake and clutch fluids. The stainless outer braid protects critical fluids from heat, abrasion and corrosion. All this helps to achieve superior and consistent performance. Use with any of our 600 series hose ends for the perfect fit, performance and reliability you can depend on.
